The information printed here reflects product design, fabrication, and component parts at the date of printing. The manufacturer reserves the right, at any time, to make changes in product design or material or component specifications as its sole option, without notice. This includes the substitution of components of a different brand or trade name, which will result in comparable performance. All information printed in this document is subject to change after the date of printing. Due to product improvements, changes during the model year and/or transcription errors that may occur, information represented within the owner's manual and/or this document may not be accurate at the time of your purchase. Please confirm any information with your dealer.

*The following is the original text as it appears in Section 8, under the heading “12 Volt DC System” of the Owner’s Manual.*

**12 Volt DC System:**

While the motorhome is driven the alternator on the engine will charge the house batteries. Likewise, while the motorhome is plugged into shore power, or the generator is running the engine battery(s) are being charged. Each system will supply 12 Volt DC power to the chassis system functions.

*The following is the updated text which will replace the original Owner’s Manual text.*

**12 Volt DC System:**

While the motorhome is driven the alternator on the engine will charge the house batteries. While the motorhome is plugged into shore power, or the generator is running, the engine (chassis) battery(s) are NOT BEING charged.

*Page numbers throughout these manuals may differ. Refer to the section main heading of “12 Volt DC System” to locate text.*
